Resume

Ju-cheol Park

Web & Mobile Developer

jukrap628@gmail.com jukrap.vercel.app github.com/jukrap

Skills

Languages	TypeScript, JavaScript, Java, Python, Dart
Web	React, Next.js, Vite, TanStack Query, Zustand, Django
Mobile / hybrid	React Native, Expo, Flutter, Android, Gradle
Testing / monitoring	Vitest, MSW, Storybook, Sentry, Ragas
Tools & Data	GitHub Actions, Jenkins, Docker, MariaDB, SQLite

Experience

Triphos Co., Ltd.

2026.02 ~ Present

Web & Mobile Developer

AI Document and Data Analysis Platform

Owned full-stack development of document upload, search, analysis and source inspection, including Gemma 4 integration.

- Evaluated long answers in batches with Ragas and checked item IDs for missing results. Let users read answers before evaluation finished.
- Removed repeated calculations, reducing median document-analysis processing from 2,969ms → 672ms (fixed model responses, 20 runs per condition after warm-up).

Settlement ERP and Mobile App

Owned full-stack development of the ERP and connected Flutter mobile work app, excluding the chat system.

- Checked server versions on concurrent edits and retained user input. Compared original, latest and entered values before explicitly saving selected changes.
- Built Excel cell correction, revalidation, batch rollback and repeat-request handling, while preserving finalized settlements when current records changed.
- Tracked mobile notification versions and deletions so delayed events could not overwrite current content. Replaced receipt writes with a single UPSERT to resolve database deadlocks.
- Connected notifications and detail navigation in Flutter and issued short-lived signed document URLs instead of passing login tokens to the download feature.

Logistics Operations Web & Printing App

Built the complete logistics web frontend and Android printing app.

- Built shared tables, forms and modals; connected search, reservations, Excel previews and print requests to server APIs.
- Reduced the initial JavaScript entry file by about 74% with on-demand page and Excel code loading (build output size).
- Connected WebView print requests to an Android bridge and Bluetooth printers. Traced SDK calls to fix missing permissions and verified physical label output.

Stock Operations Admin Web

Complete React frontend built against MSW mock APIs

- Built shared tables, filters and modals for account, stock and order screens, with column pinning, resizing and reordering.
- Kept filter selections separate from applied query conditions; updated TanStack Query when the user submitted a search.

Daily Information App

Added weather screens and server-side public API integration to an existing Android app.

- Cached responses by region and data type with matching expiry periods. Displayed current weather and core forecasts first, then supplementary data as it arrived.

Privacy Check App

Added email-breach and deepfake checks to an existing Android app using external APIs.

- Built input, inspection request and result screens, with image previews and Android file selection.

TIS

2022.06 ~ 2022.07

University Intern / Planning and data automation support

- Planned factory energy management screens in Figma and documented database tables and an ERD.
- Analyzed the KEPCO Power Planner and wrote a Python crawler to collect energy data.

Resume

Ju-cheol Park

Web & Mobile Developer

Projects

C. Donghae

2024.10.04 ~ 2024.10.06

Frontend developer / team of three

Built a map-based web service for Donghae Line passengers to find live transport and nearby information.

- Worked with two backend developers using Swagger documentation to connect APIs and build the main Google Maps screens.

ShareBBy

2024.04 ~ 2024.06

React Native app development and Firebase integration

Developed Android support and community features for an app that helps people share hobbies and find companions.

- Built post and comment creation, reading, editing and deletion, with location filters and sorting. Users can pull to refresh the list or scroll to load more posts.

github.com/jukrap/archived-rn-ShareBBy

Posture Teacher

2022.07 ~ 2023.05

Android developer / team of two

An Android app that finds body landmarks in camera frames, classifies sitting and plank posture, and records how long each posture is held.

- Built a MediaPipe AAR on Ubuntu and used landmark angles and lengths to classify posture and measure hold times.

github.com/jukrap/archived-Posture-Teacher

AI Agent Playbook

2026.06 ~ Present

Solo developer

Built a tool that helps AI coding tools refer to project rules and work history across sessions. Users can select skills to install, change the setup and recover it while preserving existing files.

- Implemented search and read access to registered repositories' records through a CLI and read-only MCP. Split long results into pages and stopped continuation if the source changed, so old and new content would not be mixed.

github.com/jukrap/ai-agent-playbook npmjs.com/package/ai-agent-playbook

Education & activities

Gyeongsang National University / Computer Science

Graduated 2023.02

GPA 3.64 / 4.5

Programmers Devcourse

2023.12 ~ 2024.05

Cloud Application Engineering, React and React Native

Programmers Devcourse / Assistant Mentor

2024.05 ~ 2024.09

Shared development resources and supported daily scrums and project reviews.

Awards

DIVE 2024 Global Data Hackathon

2024.10

Busan Technopark President Award / third in the challenge track

Gyeongnam Software Competition

2021.10

ESD HotDeal / Top Excellence Award
