Resume

Ju-cheol Park

Web & Mobile Developer

jukrap628@gmail.com jukrap.vercel.app github.com/jukrap

Skills

Languages	TypeScript, JavaScript, Java, Python, Dart
Web	React, Next.js, Vite, TanStack Query, Zustand, Django
Mobile / hybrid	React Native, Expo, Flutter, Android, Gradle
Testing / monitoring	Vitest, MSW, Storybook, Sentry, Ragas
Tools & Data	GitHub Actions, Jenkins, Docker, MariaDB, SQLite

Experience

Triphos Co., Ltd.

2026.02 ~ 2026.11

Web & Mobile Developer

AI-Powered Document and Data Analysis Platform

Led migration to Django and React, feature integration, and improvements to document search and answer evaluation.

- Reduced median internal processing from 2,969ms → 672ms by removing repeated computation; fixed model responses, 20 runs per condition after warmup.
- Fixed Ragas evaluation targets and IDs; completed 25 claims in five batches and checked missing or duplicate results.
- Used SQLGlot to compare query and aggregation conditions before and after AI repairs, blocking changed or unverifiable conditions.

Transport Settlement and Vehicle Management ERP and Mobile App

Led frontend development and expansion of existing backend APIs; integrated mobile business features, excluding the existing chat system.

- Preserved drafts through edit conflicts and comparison before resaving; verified browser, API and database results in development.
- Added batch rollback and duplicate-request protection for Excel imports; tested failures, retries and concurrent saves in isolated MariaDB.
- Resolved receipt-save deadlocks and delivered PDFs through short-lived signed URLs with permission checks, without passing login tokens.

Contract-Customer Parcel Web and Shipping Label App

Built the complete logistics web frontend and Android printing app.

- Used bundle analysis to identify and split page and Excel code unnecessary on entry, reducing the initial JavaScript file size by about 74%.
- Connected WebView print requests to an Android bridge and Bluetooth printers. Traced SDK calls to fix missing permissions and verified physical label output.
- Inspected physical labels for clipped or overlapping addresses, then adjusted wrapping by text width, font size, and line spacing.

Stock Auto-Investment and Account Management Web App

Complete React frontend built against MSW mock APIs

- Built shared tables, filters and modals for account, stock and order screens, with column pinning, resizing and reordering.
- Kept filter selections separate from applied query conditions; updated TanStack Query when the user submitted a search.

Location-Based Daily Information App

Added weather screens and server-side public API integration to an existing Android app.

- Cached responses by region and data type with matching expiry periods. Displayed current weather and core forecasts first, then supplementary data as it arrived.

Phishing Prevention and Credit Information Protection App

Added email-breach and deepfake checks to an existing Android app using external APIs.

- Built input, inspection request and result screens, with image previews and Android file selection.

TIS

2022.06 ~ 2022.07

University Intern / Planning and data automation support

- Planned factory energy management screens in Figma and documented database tables and an ERD.
- Analyzed the KEPCO Power Planner and wrote a Python crawler to collect energy data.

Projects

AI Agent Playbook

2026.06 ~ Present

Solo developer

Built a tool that helps AI coding tools refer to project rules and work history across sessions. Users can select skills to install, change the setup and recover it while preserving existing files.

- Provided project-record and skill management through a CLI and read-only MCP. Verified query scope and installation paths in Windows / Ubuntu CI.
- Used file ownership and hashes to preserve user edits, with backups and application records for recovery. Tested partial installation failures, conflicts, changes after inspection, and restoration.

github.com/jukrap/ai-agent-playbook npmjs.com/package/ai-agent-playbook

C. Donghae

2024.10.04 ~ 2024.10.06

Frontend developer / team of three

Built a map-based web service for Donghae Line passengers to find live transport and nearby information.

- Worked with two backend developers using Swagger documentation to connect APIs and build the main Google Maps screens.

ShareBBy

2024.04 ~ 2024.06

React Native app development and Firebase integration

Developed Android support and community features for an app that helps people share hobbies and find companions.

- Built post and comment creation, reading, editing and deletion, with location filters and sorting. Users can pull to refresh the list or scroll to load more posts.

github.com/jukrap/archived-rn-ShareBBy

Posture Teacher

2022.07 ~ 2023.05

Android developer / team of two

An Android app that finds body landmarks in camera frames, classifies sitting and plank posture, and records how long each posture is held.

- Built a MediaPipe AAR on Ubuntu and used landmark angles and lengths to classify posture and measure hold times.

Education & activities

Gyeongsang National University / Computer Science

Graduated 2023.02

GPA 3.64 / 4.5

Programmers Devcourse

2023.12 ~ 2024.05

Cloud Application Engineering, React and React Native

Programmers Devcourse / Assistant Mentor

2024.05 ~ 2024.09

Shared development resources and supported daily scrums and project reviews.

Awards

DIVE 2024 Global Data Hackathon

2024.10

Busan Technopark President Award / third in the challenge track

Gyeongnam Software Competition

2021.10

ESD HotDeal / Top Excellence Award
